# How to Be a Loser – Part I: Making Sure a Partnership’s Losses Are Deductible by Its Partners

Due to deductions for interest, regular and bonus depreciation, and business expenses, it is common for a partnership or limited liability company to have a net loss for one or more taxable years. In order to claim their distributive shares of such losses, under Section 704(d)(1) of the Code, the partners or members need to have sufficient basis in their partnership interests and, under Section 465(a)(1) of the Code, they may also need to have a sufficient amount at risk, to deduct such losses. If not, such losses will either be reallocated to other partners or members, or be suspended at the entity level. Part I will discuss planning to make sure the partners or members have sufficient basis in their partnership interests and a sufficient amount at risk to claim their distributive shares of such losses. Part I will also discuss whether such losses at the partner or member level are passive or active for purposes of Section 469 of the Code.

QSBS Planning: A Cocktail Party Idea, with a Small Chance of Qualifying
How many trusts can I put my qualified small business stock (“QSBS”) into? Can both my spouse and I take advantage of the opportunity? None of my friends pay tax when they sell QSBS stock. - There is generally a large gap between what can be done with QSBS and what advisors and google think is possible. The leverage that can be applied to the right circumstances can be enormous. Here we will sort out truth from fiction. We will discuss the challenges to a lot of the proposed planning options. Whether it is the variety of trusts under Code §663(c), debunking statutory interpretation games practitioners play, inclusion under Code §2036(b) and the trade-offs for the various structures, we will educate and entertain as we navigate the narrow channel for qualification. The tools provided for new transactions and adjustments to current plans, with potential tax legislation will be discussed.

Luncheon & Keynote Address:
Prof. Edward J. McCaffery
The Past, Present and Future of Wealth Transfer Taxation
